COMPANY PROFILE

## About Us

JCB is a world leading manufacturer of mining, construction and power generating equipment. Established in England in 1945 by Joseph Cyril Bamford, JCB has developed a reputation as the industries leading innovator, as seen through the invention of some of the industries best known equipment like the Backhoe loader (TLBs) and the Telescopic Handlers.

BH Botswana has been the nation's sole distributor of JCB construction, mining and power generating equipment since 1973. We have built a reputation of having the country's best and most extensive aftermarket service to compliment our industry leading equipment.

Our Head Office is in Gaborone and we have branches in Francistown and Orapa. BH Botswana has built a network of national coverage and boast a family of business's covering South Africa to Zambia.

BH Botswana comprises of a team of devoted employees with staff compliment of over 70 people. Each of our personnel is qualified in their field of specialisation and are specially trained to service JCB machinery.

## Vision

- To be Botswana's most customer centric construction and power generation partner.

## Mission

- At BH we understand that for us to grow, our customers need to grow. We support their growth with world class JCB products and customised aftersales service.

## Our Core Values

- Professionalism
- Communication
- Integrity
- Accountability
- Urgency
- Health and Safety

## Our Services

- We specialise in supplying JCB construction and industrial equipment, power generators and genuine parts, all backed up by the country's best and most extensive aftermarket service network.

OUR  
PARTS TEAM HAS  
EXPERT KNOWLEDGE  
AND IS READY TO ASSIST  
IN ANY PROBLEM WITH  
EXTENSIVE STOCK  
AVAILABLE  
IN-HOUSE

## Parts & Service Support

We provide parts support by stocking a comprehensive range of genuine spare parts and ground engaging tools received from the various JCB world parts centres around the world. We maintain high level of service by training our staff locally and internationally. Our service department has a fleet of over 27 standby and onsite service vehicles as an extension of our commitment to customer service.

We train our service team regularly on international training standards to ensure our service team are always ahead of the ever changing technologies JCB equipment innovate.

### 1 Wheeled Loading Shovel

The latest JCB wheeled loading shovels move more material for less fuel. Equipped with only proven components for the ultimate performance. JCB Wheeled Loading Shovel continue to be the industries safest, most efficient and most productive machine on the market.

### 2 Hydraulic Excavators

JCB's latest large tracked hydraulic excavators provide great manoeuvrability and versatility while boasting improved efficiency, safety and operator comfort. Peak power and torque are produced at low revs and to extend uptime, there are countless durability and maintenance saving features.

### 3 Backhoe Loaders

JCB invented the backhoe loader in 1953. Since then, we have remained the market leader, inventing features like extendable digging end and the sideshift chassis, which have resulted in JCB Backhoes being the world's best selling machines.

### 4 Telescopic Handlers

JCB invented the telehandler concept in 1977, and we have remained the world first choice for a good reason. Our latest Loadalls are built for total productivity, boasting high performance, low running costs, top build quality, versatility and high residuals.

**5** Industrial & Rough Terrain Forklifts

JCB Rough Terrain Forklifts (RTFLs) are the reliable, versatile and toughest solution for your off-road material handling. RTFLs are designed for high mobility and superb productivity in rough terrain. Our trio of RTFLs have a range of operating weights, lift capabilities to suit, and they are all powered by our world renowned Dieselmox engine.

**7** Skid Steer Loaders

JCB Skid Steers are the world's safest skidsteer because they offer unparalleled 270° visibility which is 60% more than ordinary skid steers. This is because JCB Skid Steers have a unique power boom design to promote operator's safety, productivity and machine reliability, even under the most extreme job site conditions.

**6** Compaction Equipment

Combining soil compaction heritage with JCB's innovation, our models are manufactured to world class standards for unrivalled quality and reliability.

**8** Power Products

Our power generation range is typically comprehensive, with over 170 models to cover every possible requirement and range from 20kVA to 3200 kVA. There is everything from portable diesel generators to full container-size power solutions as well as lighting towers, all setting new standards of performance and reliability.

JCB Livelink is an innovative software system that lets you monitor and manage your machines remotely online by email or mobile phone. BH Botswana personnel monitors machines from Gaborone to pick alerts, schedule upcoming service and ensure maximum uptime for our customers equipment on Livelink.

Livelink gives you access to a whole host of useful data, including:

- Machine location
- Fuel consumption
- Idle time
- Working hours
- Curfew alerting
- Machine health monitoring and alerts
- Alerting on service requirements
- Geo-fencing capability
- Maintenance history reporting
- Enhanced dealer support

Get in touch with Livelink through:  
[www.jcbl.com](http://www.jcbl.com)

Our attachments are all designed and manufactured to be perfectly matched to your machine. We use only top quality components, combined with engineering expertise and exhaustive testing to ensure quality and durability.

JCB offers an array of attachments for the various machine applications available to complete the solution:

- Buckets and shovels
- Augers and earthdrills
- Forks and frames
- Grabs and grapples
- Hydraulic hammers
- Muck Fork & Grabs
- Patch Planers
- Quickhitches (hydraulics and manual)
- Sweeper collector
- Concrete mixers
- Trenchers
